20	Product Management	9	3 Weeks	8, 000.00

Avoid intoxication in all its forms and the desire to please anyone through spending.

Photo editing involves enhancing and manipulating images to improve their appearance, and correct imperfections to convey a desired mood or message. With the proliferation of smartphones and mobile apps, photo editing has become accessible to everyone, allowing users to edit images directly on their mobile devices. Consider the following examples of mobile photo editing apps:

PHOTO EDITING APPS:

- ***Snapseed:*** Developed by Google, Snapseed offers a wide range of tools and filters for editing photos. It includes features like selective adjustments, HDR, curves, and healing tools.

- ***Adobe Lightroom Mobile:*** A mobile version of the popular desktop software, Lightroom Mobile provides powerful editing tools, including presets, selective adjustments, color grading, and advanced photo organization.

- ***VSCO:*** Known for its stylish presets and film-inspired filters, VSCO offers editing tools for exposure, color, and contrast adjustment, as well as film emulation effects.

- ***Instagram:*** Apart from being a social media platform, Instagram offers basic photo editing tools like filters, adjustments for brightness, contrast, saturation, and cropping.

FORMS OF PHOTO EDITING:

There are various forms of photo editing with the goal of producing whatever the author or photography wishes to achieve. The photographer have the liberty to make a lot of tweaks in order to achieve an end result. Consider the following:
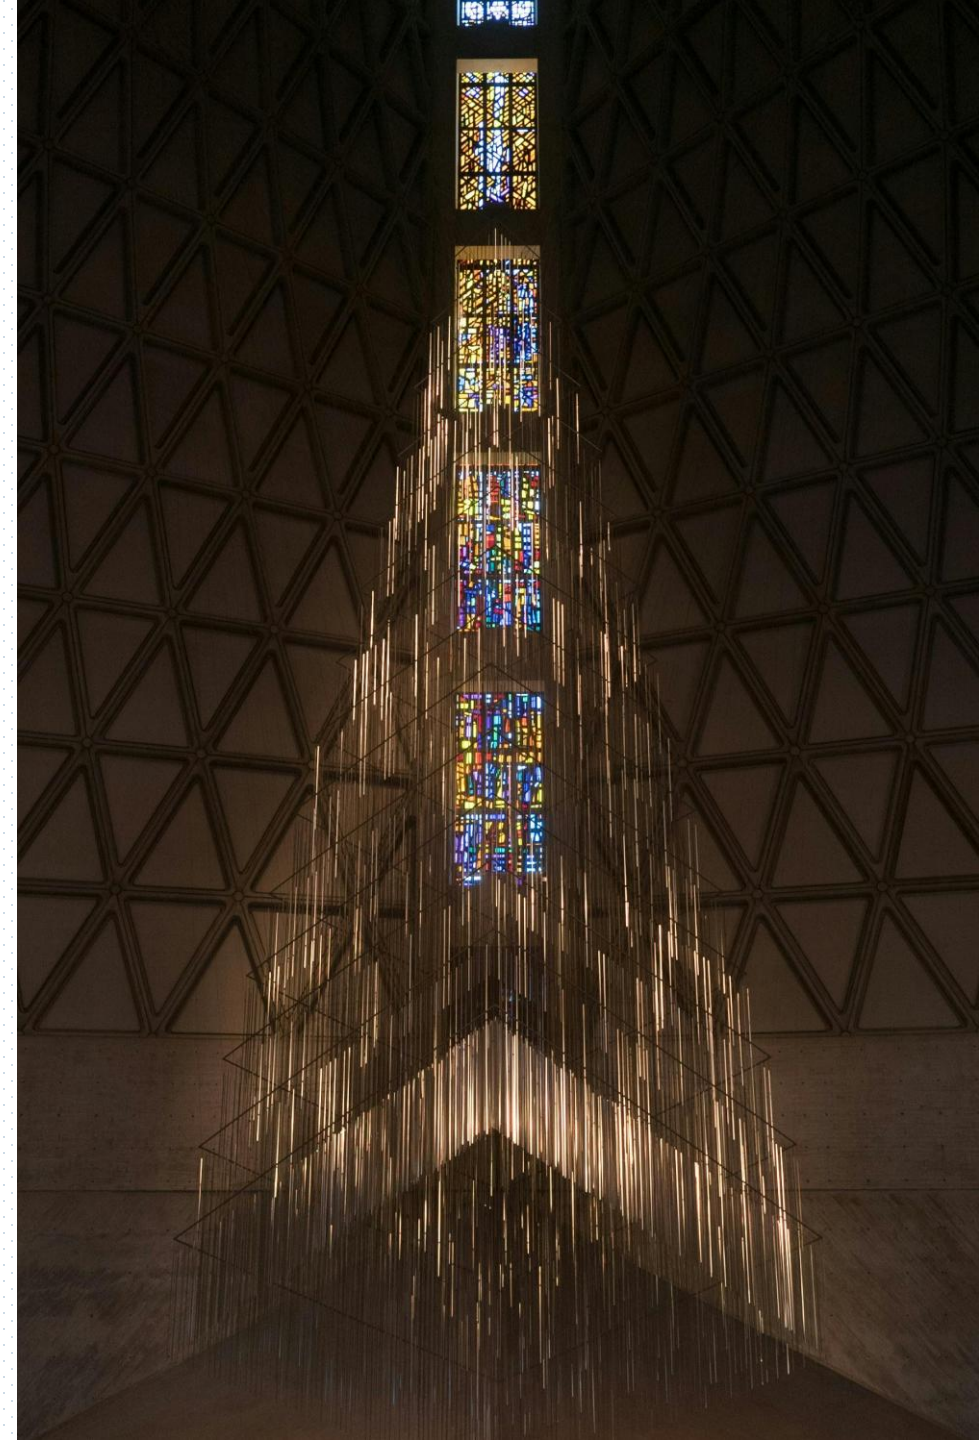

01

EXPOSURE AND CONTRAST ADJUSTMENT:

- Adjusting exposure and contrast can enhance the overall brightness and dynamic range of an image.

- Increase exposure to brighten dark areas and decrease exposure to darken bright areas.

- Adjust contrast to increase or decrease the difference between light and dark areas, enhancing the overall impact of the image.

02 **COLOR CORRECTION:**

- Color correction involves adjusting the colors in an image to achieve a desired look or correct any color casts.
- Use temperature and tint adjustments to modify the overall color balance of the image.
- Adjust saturation and vibrance to enhance or reduce the intensity of colors in the image.

03

CROPPING AND STRAIGHTENING:

- Cropping allows you to remove unwanted elements and improve the composition of the image.

- Straighten the image to correct any tilted horizons or skewed angles, creating a more visually pleasing result.

04

SHARPENING AND NOISE REDUCTION:

- Sharpening enhances the clarity and detail of an image, making it appear sharper and more defined.

- Reduce noise to smooth out graininess and speckles in the image, particularly in low-light conditions or high ISO settings.

05

CREATIVE FILTERS AND EFFECTS:

- Experiment with creative filters and effects to add artistic flair and personality to your photos.

- Apply presets, overlays, textures, and vignettes to create unique looks and styles.
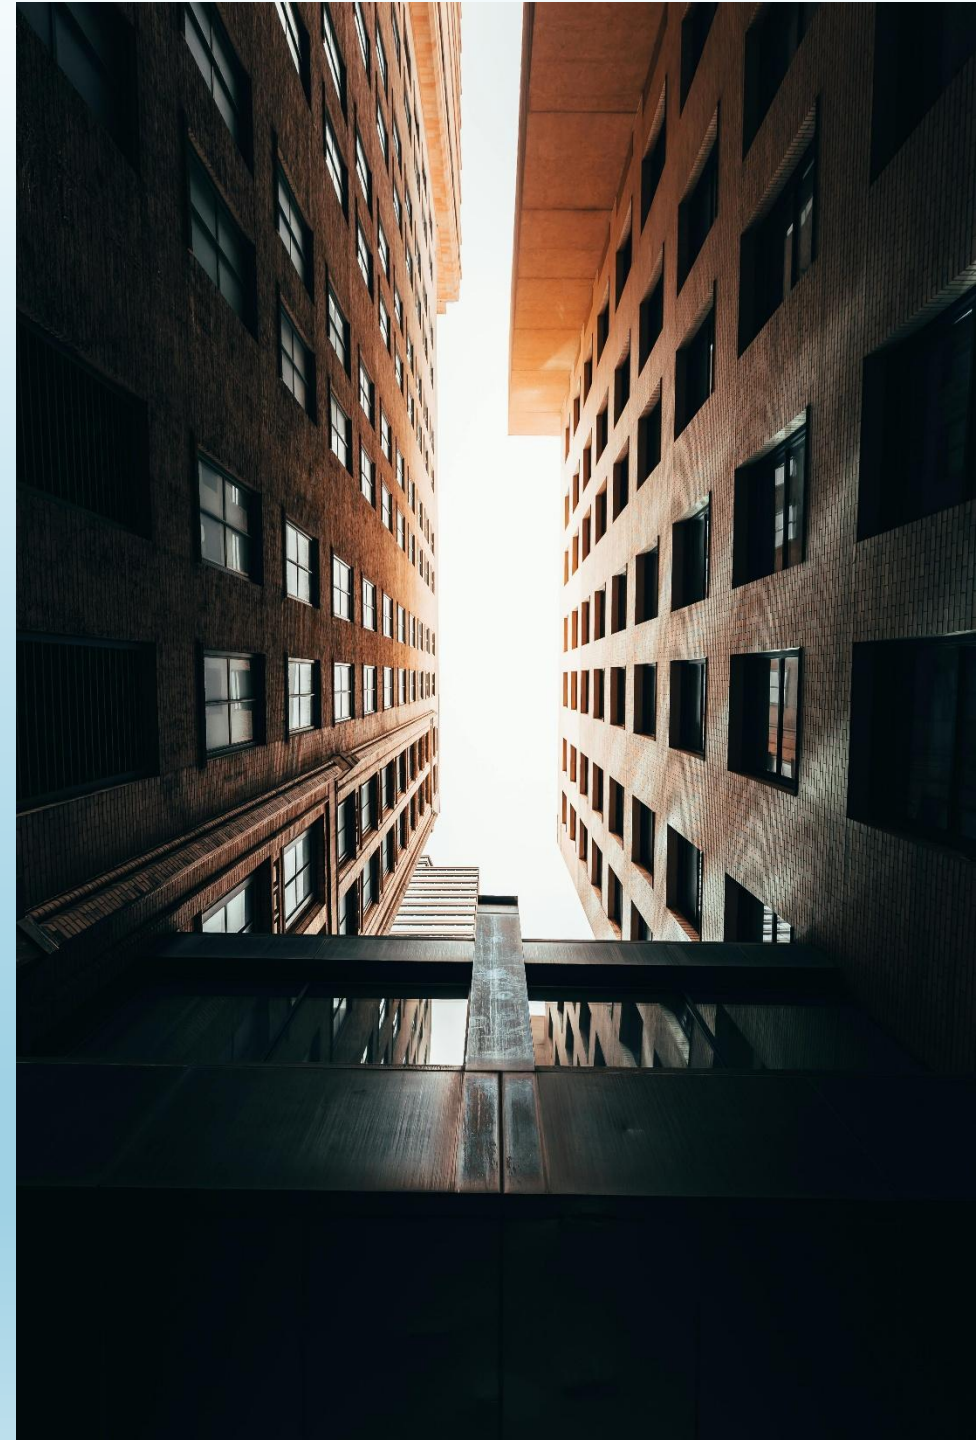

CREATIVE PHOTOGRAPHY IDEAS

In this section, let's explore creative photography ideas that can provide a starting point for exploration and experimentation across various genres. Don't be afraid to step out of your comfort zone, try new techniques, and let your creativity flourish!

MACRO PHOTOGRAPHY:

- Explore the miniature world by capturing close-up shots of small subjects like insects, flowers, or everyday objects.
- Experiment with different macro lenses or extension tubes to achieve extreme close-up shots with intricate details.
- Use a shallow depth of field to isolate the subject and create a dreamy, blurred background.
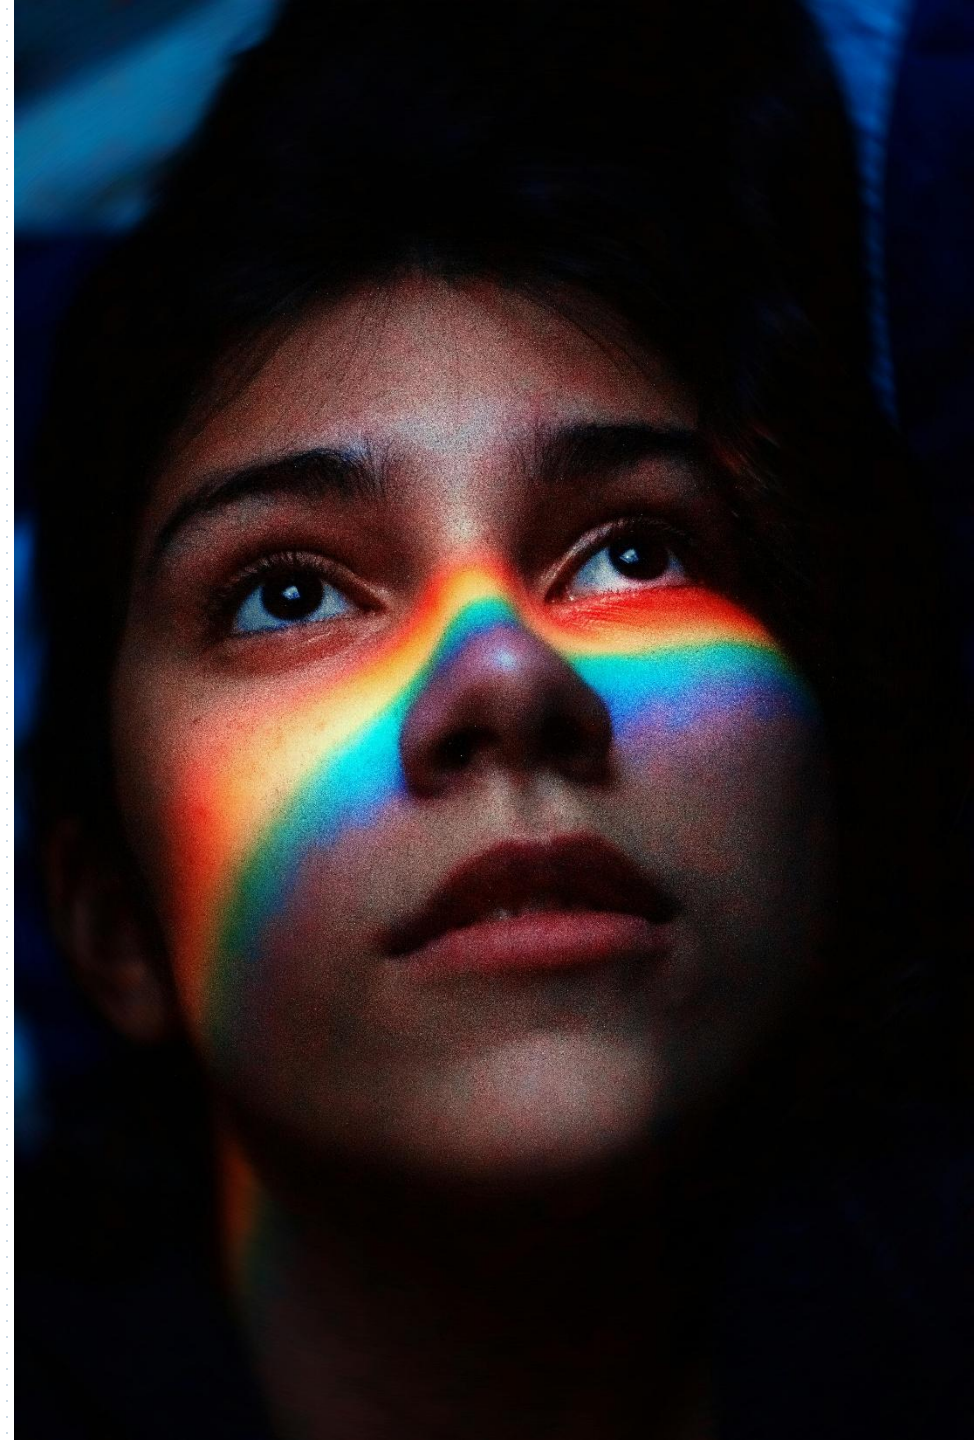

02 LONG EXPOSURE PHOTOGRAPHY:

- Capture mesmerizing long exposure shots of landscapes, cityscapes, or moving subjects like waterfalls, rivers, or traffic.

- Use a tripod to keep the camera stable during long exposures and avoid camera shake.

- Experiment with different exposure times to create varying effects, from silky smooth water to streaks of light trails.

03 PORTRAIT PHOTOGRAPHY:

- Experiment with different lighting setups, from natural light to studio lighting, to create different moods and atmospheres in portraits.
- Explore unique locations and backgrounds to add visual interest and context to your portraits.
- Encourage natural and candid expressions by interacting with your subjects and making them feel comfortable in front of the camera.

LANDSCAPE PHOTOGRAPHY:

- Capture the beauty of the natural world by photographing stunning landscapes at different times of the day, from sunrise to sunset.

- Use leading lines, foreground interest, and framing techniques to create depth and perspective in your landscape shots.

- Experiment with different compositions and viewpoints to showcase the vastness and grandeur of the landscape.

05 *STREET PHOTOGRAPHY:*

- Explore the dynamic and bustling streets to capture candid moments, interesting characters, and urban scenes.
- Experiment with different focal lengths and shooting techniques to capture intimate portraits, fleeting moments, or captivating street scenes.
- Pay attention to light, shadow, and composition to create compelling and storytelling images.
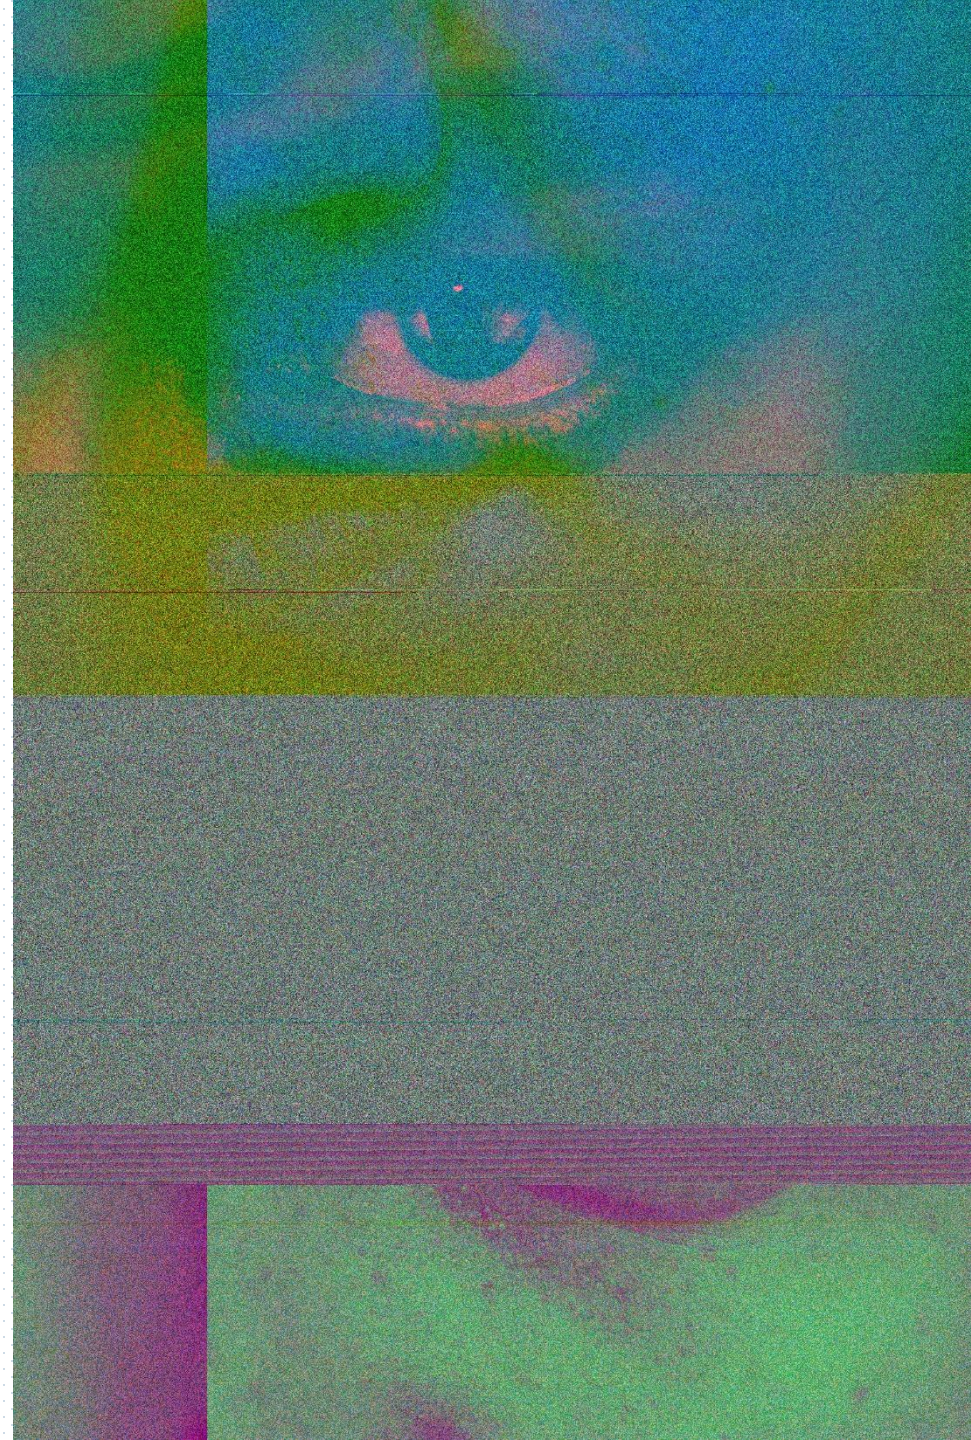

06 EXPERIMENTAL PHOTOGRAPHY:

- Push the boundaries of traditional photography by experimenting with creative techniques like double exposure, light painting, or photomontage.
- Combine multiple images or layers to create surreal and imaginative compositions.
- Let your imagination run wild and embrace the unexpected results that come from experimenting with unconventional techniques.

ABSTRACT PHOTOGRAPHY:

- Explore the world of abstract photography by focusing on shapes, colors, patterns, and textures rather than recognizable subjects.

- Look for interesting details and compositions in everyday objects or architectural elements.

- Experiment with close-up shots, unconventional angles, and minimalistic compositions to create visually striking abstract images.

EXERCISE 01:

Using any of the mobile photo editing apps, implement the following options:

1. Exposure & Contrast Adjustments

2. Color correction

3. Cropping & Strengthening

4. Creative filters & Effects

EXERCISE 02:

Implement the following creative photo ideas:

1. Macro Photography
2. Long Exposure Photography
3. Portrait Photography
4. Street Photography
5. Landscape Photography
